RE: Advantage Mechanical-Refrigeration
3836 Russell St NE
Suite 1
Cedar Springs, MI 49319

Subject: Letter of Recommendation for Advantage Mechanical-Refrigeration (AMR)

To Whom It May Concern:

Our team recently had the pleasure of working with AMR on two successfully completed projects: the Muskegon Museum of Art and the Martin Luther King Park & Community Center. AMR was a valuable partner whose expertise and professionalism contributed significantly to the success of both projects.

The Muskegon Museum of Art presented unique mechanical challenges, requiring highly specialized HVAC systems to maintain strict environmental conditions necessary for artwork preservation and accreditation standards. The project also demanded extensive coordination to conceal piping and ductwork within limited ceiling spaces while avoiding conflicts with structural elements. AMR played a critical role in coordinating these complex systems, delivering solutions professionally, efficiently, and with a strong focus on cost management.

On the Martin Luther King Park & Community Center project, AMR consistently met schedule requirements and provided timely, cost-effective solutions throughout construction. Their team was exceptionally organized and instrumental in managing the submittal and LEED documentation processes. Through their efforts, the project achieved LEED certification prior to final completion, an accomplishment that is uncommon on many LEED projects.

AMR's field and office staff were professional, responsive, and collaborative throughout both projects. Based on our experience, we would welcome the opportunity to work with them again.

We confidently recommend Advantage Mechanical-Refrigeration, Inc. for any future project requiring a skilled, dependable, and results-driven mechanical contractor.

Sincerely,
Erhardt Construction
